Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kubota et al. (EP 0,969,082), hereinafter "Kubota".

Kubota teaches Base Particles 1 comprising 20 wt% sodium carbonate, 10 wt% sodium sulfate and 1.5 wt% sodium sulfite (a total of 31.5 wt% water-soluble alkali inorganic substance), having an average particle size of 225 μm (see Table 1 on page 19), which Base Particles 1 were prepared by spray drying (see page 18, lines 1-21). To 100 parts by weight of Base Particles 1 was added 3 parts by weight of palmitic acid (an acid precursor of anionic surfactant), and the resulting mixture was surface coated with 8 parts by weight of crystalline aluminosilicate and the resulting detergent composition has an average particle size of 270 μm (see Table 2, Example 5 on page 21 and page 23, line 56 to page 24, line 10). Kubota teaches the limitations of the instant claims. Hence, Kubota anticipates the claims.

3. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Kanai et al. (US Patent No. 5,821,207), hereinafter "Kanai".

Art Unit: 1751

Kanai teaches a powder detergent composition comprising 30 parts by weight (30wt%) sodium carbonate having a particle size of about 300 μm (see Example 10, col. 15, line 51 to col. 16, line 3). Kanai teaches the limitations of the instant claims. Hence, Kanai anticipates the claims.
